Dated: 09 December 2022

What is this Product?

TYPE: Utilico Emerging Markets Trust plc (the “Company”) is registered as an investment company and intends to carry on its business at all times so that it qualifies for approval as an investment trust. You can invest in the Company by purchasing Ordinary Shares (the “Shares”). The Shares are admitted to the premium segment of the Official List and to trading on the London Stock Exchange’s main market for listed securities. The Company is jointly managed by ICM Ltd and ICMIM, who control where investments are made.

OBJECTIVE: The Company’s objective is to provide long-term total return through a flexible investment policy that permits it to make investments in shares, bonds, convertibles and other types of securities, predominantly in infrastructure, utility and related sectors, mainly in emerging markets. There are no specific industry sector exposure limits. The Company will acquire and dispose of investments in line with its investment policy. Some of the key aspects of the Company’s investment policy include that: investments in unlisted securities should not exceed 10% of gross assets at the time of investment; no single investment will exceed 20% of gross assets at the time of investment; investments in a single country must not exceed 50% of gross assets at the time of investment; derivatives may be used for efficient portfolio management; bank borrowings, in any currency exposure appropriate to the portfolio and not exceeding 25% of gross assets, may be utilised for short or long-term liquidity purposes. The Company has borrowed and may borrow in the future to purchase assets, which will magnify any gains or losses made by the Company.

INTENDED RETAIL INVESTOR: The Shares are intended for retail investors based in the UK, as well as professionally-advised private clients, who understand and are willing to assume a medium-high level risk of capital loss in order to potentially receive a higher return. The Shares are only intended for those investors for whom the Shares form part of a portfolio of investments. The Shares do not have a maturity or expiry date. The recommended holding period for the Shares is at least 5 years. You may sell the Shares on the London Stock Exchange on any London business day between 8:00am and 4.30pm. Typically, at any given time on any given day, the price you pay to buy the Shares will be higher than the price at which you could sell them.

What are the risks and what could I get in return?

SUMMARY RISK INDICATOR:

< >
Lower Risk **Higher Risk**

The risk indicator assumes you keep the Shares for at least 5 years. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions could impact the amount you get back. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

The required Summary Risk Indicator only reflects historic share price volatility of the Company’s Shares. It excludes other risks inherent in the product and therefore does not show the full risk to the investor.

What are the risks and what could I get in return? (continued)

PERFORMANCE INFORMATION:

The main factor which is likely to affect your future return is the financial performance of the Company's investments by reference to the growth in the portfolio companies' profit and cash generation. Such performance could be affected by broader geopolitical and macro-economic factors, such as economic growth, inflation and monetary policy. Other factors that could impact future return include, but are not limited to: the ability of the Company's investment managers to attract and retain key investment staff; the market price of the Shares in relation to Company's net asset value and the discount or premium at which they trade; failure by any of the Company's service providers to carry out their obligations to the Company; the level of the Company's borrowings; and continued compliance with all applicable and regulatory requirements. The Company has delivered an average net asset value total return of 9.3% per annum since its launch in July 2005, although past performance is not a guide to future performance.

The Company uses the MSCI Emerging Markets Index (GBP adjusted) as a comparator for performance but the composition of that index has no influence on investment decisions. The Company's portfolio is very different from the index and therefore over the short term there may be periods of sharp underperformance or outperformance compared with the index.

What could affect my return positively?

Your return will be positively affected if the Company's share price increases and you are able to sell your Shares at a premium to the price you paid for such Shares on acquisition. The Company's share price performance is likely to improve when the financial performance of the Company's investments is good, if there is a positive macro-economic environment and financial markets are buoyant.

What could affect my return negatively?

Your return will be negatively affected if the Company's share price decreases and you are not able to sell your Shares for more than the price you paid for such Shares on acquisition. The Company's share price is likely to be negatively affected when the financial performance of the Company's investments is below expectations, if there is a negative macro-economic environment, geopolitical instability and/or volatile financial markets.

Under severely adverse market conditions, it is likely that the Shares would trade at a significant discount to the Company's net asset value and consequently there is a risk that the value of the Shares could reduce substantially.

What happens if the Company is unable to pay out?

As a shareholder of the Company, you will not be able to make a claim under any investor compensation scheme in the event that the Company is unable to pay out.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

COSTS OVER TIME: The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

Investment £10,000

| If you sell your Shares | after 1 year | after 3 years | after 5 years (Recommended holding period) |
|---------------------------------|--------------|---------------|---|
| Total Costs | £142 | £458 | £822 |
| Impact on return (RIY) per year | 1.42% | 1.42% | 1.42% |

What are the costs? (continued)

COMPOSITION OF COSTS: The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period; and
- The meaning of the different cost categories

| This table shows the impact on return per year | | | |
|--|-----------------------------|--------|---|
| One-Off Costs | Entry Costs | 0.00% | The Company does not charge investors a fee for buying their Shares |
| | Exit costs | 0.00% | The Company does not charge investors a fee for selling their Shares |
| Ongoing costs | Portfolio transaction costs | -0.15% | The impact of the costs of us buying and selling underlying investments for the product |
| | Other ongoing costs | 1.57% | The impact of your costs that we take each year for managing your investments, including interest costs on borrowings (0.13%) |
| Incidental costs | Performance fees | 0.00% | There is no performance fee |
| | Carried interests | 0.00% | There are no carried interests |

How long should I hold it and can I sell my Shares early?

RECOMMENDED HOLDING PERIOD: At least 5 years

The Shares do not have a maturity or expiry date and as such the recommended holding period is expected to be at least 5 years, but the Shares may be held for longer than this. Equally, you may sell your Shares at any time without penalty through a broker, private investor plan administrator or adviser. You may have to pay brokerage fees, commissions and other related costs, payable to entities other than the Company, as a result of selling the Shares.

The price at which you sell your Shares will be determined at arms' length based on trading prices at the time on the London Stock Exchange and will not necessarily be equal to the value of the net assets of the Company. The share price is updated regularly on the website www.uemtrust.co.uk.

You may be able to sell your Shares on the London Stock Exchange on any London business day between 8:00am and 4:30pm.

How can I complain?

As a shareholder of the Company, you do not have a right to complain to the UK Financial Ombudsman Service. In order to make a complaint, write to us at Company Secretary, PO Box 208, Epsom, Surrey, KT18 7YF, visit our website at <https://www.icm.limited/icm-investment-management> (which lists our contact information), email us at webcontact@icm.limited or call us on 01372 271486. If you have a complaint about any transaction through your broker, private investor plan manager or adviser, you should contact that person or organisation directly.

Other relevant information

The cost and risk calculations included in this Key Information Document follow the methodology prescribed by EU rules as they form part of UK law by virtue of the European Union (Withdrawal) Act 2018, as amended.

If you wish to find out further information about the Company, please visit our website www.uemtrust.co.uk to view other publicly available information in relation to the Shares including the Company's latest report and accounts which contains a separate section on the Company's principal risks and risk mitigation. Alternatively, please write to us at Company Secretary, PO Box 208, Epsom, Surrey, KT18 7YF.

If you are in any doubt about the action you should take, you should seek independent financial advice.
